

23RD ANNUAL

23RD LCI CONGRESS
OCTOBER 19-22

The Mindset of an Effective Big Room

Tammy McConaughy, JE Dunn Construction

Lindsay Rosti, JE Dunn Construction

LEARN BY DOING FROM THOSE WHO DO

Tuesday, October 19, 2021

Health precautions to keep everyone as safe as possible at Congress:

- Wear masks at all times in indoor events.
- Complete your daily health screening on your phone and bring it with you when you enter the center each day.
- Practice social distancing to the extent possible. Seating at plenary sessions is structured to help with this.
- If you feel ill at any time, please leave the conference and return to your room/consult a physician as necessary.
- Ultimately, our collective health and safety at Congress is up to all of us. Thanks for your support!

LCI Course:
The Mindset of an Effective Big Room
4 CEU

Sign the sign-in sheet for credit

Learning Objectives

Define the meaning of a Big Room, and understand the purpose and benefits of implementing the approach to improving project outcomes.

Understand the characteristics and behaviours of a Big Room Team including aspects of effective facilitation.

Identify the venue types for hosting a Big Room, and discover the key elements for tailoring the space to support collaborative activities.

Gain insights into how the Big Room approach supports knowledge sharing and enhanced collaboration.

Rules of Engagement

This is a safe zone

Use E.L.M.O.

Everyone has equal status

Silence phones

Speak up and share your ideas

Be focused and engaged

Actively listen to others

Stay on time

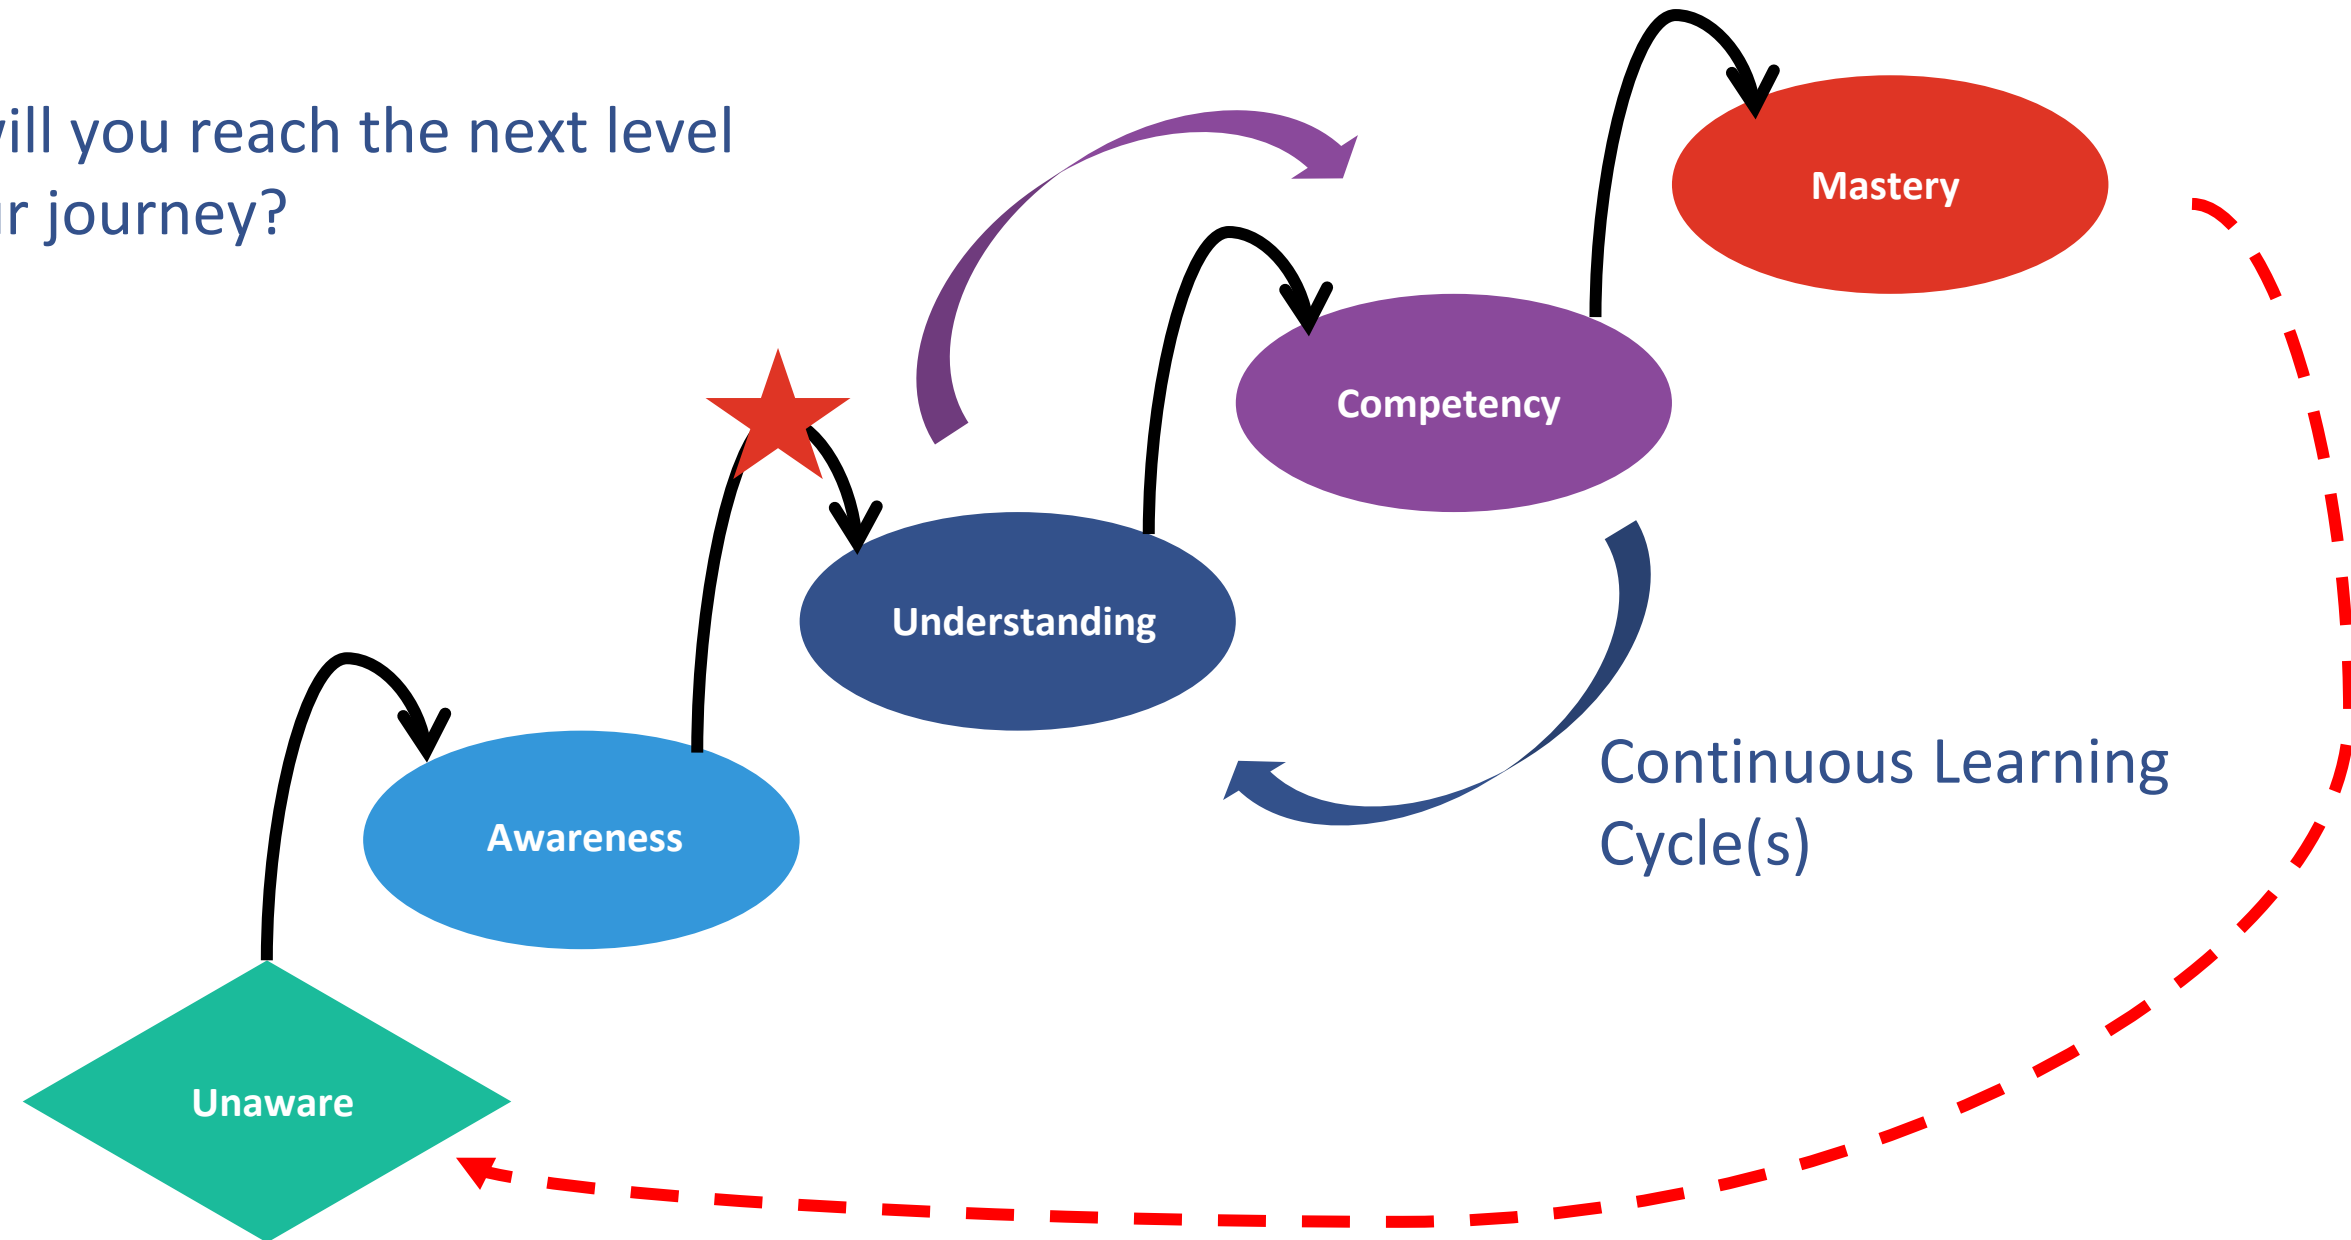

One conversation at a time

Have fun!

Lean Journey to Mastery

How will you reach the next level on your journey?

Today's Process

- We will facilitate discussions in small and large groups.
 - Small groups will report back to the large group.
- If you have Big Room experience, great! But prior experience is not necessary.
 - You will be able to think logically about the topics to be discussed.
- We will take “Live Notes” on the screen or a flip pad to capture your ideas.
 - You will receive these Notes by email after the Congress.
 - LCI is compiling ideas from each Big Room training session so the entire community can continuously learn.

WHAT IS YOUR ACTUAL SUPERPOWER?and how do you use it?

Six Tenets of Lean

- 1 Respect for people
- 2 Optimize the Whole
- 3 Generate Value
- 4 Eliminate Waste
- 5 Focus on Flow
- 6 Continuous Improvement

Big Room - Definition

Big Room refers to a project approach of bringing key individuals together to speed communication and decision-making, and to reduce siloed thinking or approaches.

At its core, the Big Room is a scheduled and recurring event.

It brings key stakeholders together to collaborate, plan, update, solicit resources, invite feedback, demonstrate accountability, make decisions, schedule events and compare the project's current state to the published goals or Conditions of Satisfaction.

Photo Credit: InsideOut Consulting, Inc.

Big Room - Definition

- A *mindset* of intense focus on advancing work
- Is instrumental in *cross-functional* team collaboration
- Refers to the collaborative *behavior* of a team and the work they are producing
- *Visually displays* all information needed to guide the team

Co-located or Dispersed

Teams can either be *co-located* or *dispersed* in their set-up.

Co-located: Members of the team are located in the same physical location allowing for face-to-face continuous collaboration.

- Co-located teams schedule Big Room sessions to come together with a focused agenda.

Example of a co-located team.

Dispersed

Dispersed: Members of the team are located at their respective company site locations.

Face-to-face collaboration may continuously happen within their organization but does not happen with the broader team.

Dispersed Teams can employ differing approaches to the Big Room Session:

- **Recurring in-person sessions**
The Big Room team meets in person on a scheduled recurring basis.
- **Hybrid sessions**
Combination of in-person and virtual sessions.

Example of dispersed team in a Big Room session.

Big Room Example

Big Room Examples

Can you have a Big Room on-site?

How does the Big Room fit into the Lean design and construction approach?

Discuss as a whole group.
(10 minutes)

Take Live Notes.

Purpose

The purpose of a Big Room is to:

- Support cross-functional high-performing teams in advancing work.
- Add value by driving down overall project costs.
- Facilitate rapid advancement of work in a short time frame.
- Enhance collaborative brain power of the team.

Big Room is a commitment to a project,
the team, and to working together!

Example of a small project Big Room

Benefits

A Big Room benefits the project by:

- Improving collaboration through greater team interaction.
- Allowing team members to support each other and align themselves with the goals of the project.
- Breaking down the silo mentality within the project.
- Leading to improved project outcomes.

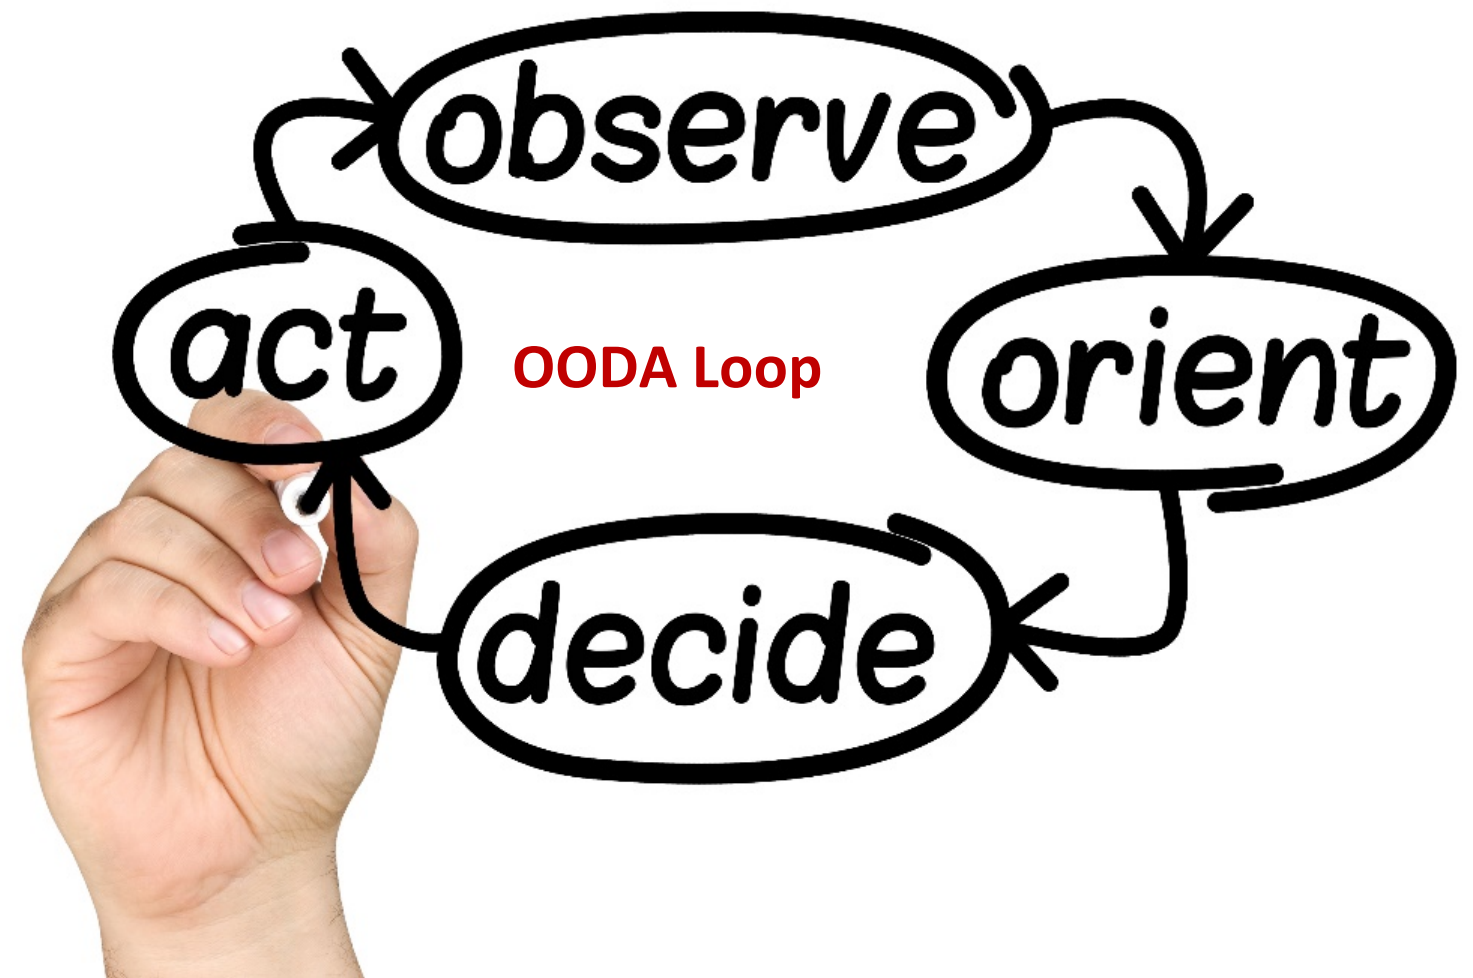

Example of a Big Room

Add the Core:

The Big Room is a space for the team to gather that supports a team in:

- Seeing the situation (Observe).
- Grasping the situation (Orient).
- Making aligned decisions (Decide).
- Taking Action (Act).

The *OODA Loop* is the cycle of Observe-Orient-Decide-Act, developed by military strategist and US Air Force Colonel John Boyd. It is often applied to understanding commercial operation and learning processes.

Big Room Implementation

When:

- As early in the project as possible.
- The frequency must support the work at hand.
- Teams must continuously evaluate the frequency and duration of sessions.

Who:

- Participants will change overtime as the project advances.

Keys to Peer Facilitation

We are about to begin a series of Small Group discussions in which most of you will have an opportunity to Peer Facilitate, so...

- Stay calm and *neutral*.
- Don't contribute – instead ask questions.
 - If you wish to prompt a thought in the group, ask a leading question, like “Have you thought about?”
 - If you *must* make a point, hand “the pen” to another member to be the neutral facilitator, until you finish.
- Assure everyone speaks. Use “round robin” if needed.
- Watch the time.

Why do we need to use a Big Room on projects?

Discuss in small groups. **(5 minutes)**

- One person facilitate.
- Identify 3-4 reasons.
- One person take notes & report back.

Take Live Notes.

Report back to whole group. (15 minutes)
Don't repeat same idea.

How would you structure or organize your Big Room?

Discuss as a whole group. **(10 minutes)**

Take Live Notes.

- Examples:
 - Team where everyone co-locates for several weeks/months.
 - Team where most meet 1 day a week.
Long distance team members join by GoToMeeting.
 - Design/Build or IPD team where the Big Room includes a co-location and runs the entire project from conception to completion.
 - Others?

Examples

Co-located:

- Continuously located with continuous collaboration.

Recurring:

- Meet in person on regular scheduled recurring basis.

Hybrid:

- Combination of in-person and virtual.

Photo Credits: InsideOut Consulting, Inc.

Spatial Needs for Activities

- Planning
- Learning
- Team-building
- Collaborative problem solving
- Target cost conversations
- Decision making
- Commitments
- Team health & assessments
- Ad hoc conversations
- Retrospectives
- What else?

Photo Credits: InsideOut Consulting, Inc.

Advancing the Work

Advancing the Work

Teams Interact to Problem Solve!

Photo Credit: InsideOut Consulting, Inc.

- Cross functional
- Visual management
- All perspectives
- Explore options
- Gain alignment

Setting up a Big Room

- Very large configurable room
- Several smaller conference rooms
- Cluster group work spaces
- Planning space (Last Planner System® weekly boards and phase pulls)
- Small private breakout spaces
- Spaces to celebrate
- “Collision spaces” like Kitchen/break room
- Visual information
- Needs to be re-designable as the team evolves

Photo Credits: InsideOut Consulting, Inc.

What “real world” space challenges need to be overcome? How?

Discuss as a whole group.
(10 minutes)

Take Live Notes.

When we reconvene find the topic you want to work in for 30 minutes and sit there:

1. Desirable Behaviors
2. Effective Facilitation
3. What Could Go Wrong
4. Learning
5. Onboarding
6. Technology
7. Meetings that Matter

BREAK – 15 minutes

Small Focus Group Topics

1. Desirable Behaviors
2. Effective Facilitation
3. What Could Go Wrong
4. Learning
5. Onboarding
6. Technology
7. Meetings that Matter

Discuss in small groups. **(30 minutes)**

- One person facilitate – make sure everyone talks.
- Use flip charts.
 - Two people take responsibility for planning the report out.
- Define the subject: what does it mean in the Big Room?
- Brainstorm topics and ideas.

Report out to whole group. **(30 minutes)**

- Wander from group to group . **(5 minutes each)**
- Take Live Notes.

Lean Construction Institute
Immersive Education Program

1. Desirable Behaviors

Desirable Behaviors

- Overcoming silos
- Leadership
- Conditions of Satisfaction (CoS)
- Respectful collaboration
- Maintaining enthusiasm
- Trust & respect
- Learning

Temecula Valley Hospital Big Room

The Big Room Mindset

Photo Credit: InsideOut Consulting, Inc.

- Fostering behaviors that lead to high levels of collaboration.
- Understanding the behaviors and activities of the environment.
- Establishing high-performing teams.

Effective Leaders are:

- Bold
- Observant
- Channel positive team energy
- Distinguish strength and weaknesses of team members
- Motivational
- Take action

Photo Credit: InsideOut Consulting, Inc.

Conditions of Satisfaction (CoS)

- The project CoS define what “success” means for the project.
- The CoS guide decision making throughout development and implementation of a project.
- Each CoS is a commitment, and all team members are responsible for delivering according to the CoS.

Lean Construction Institute
Immersive Education Program

2. Effective Facilitation

Effective Facilitation Practices

- Collaboratively developed
- Clear
- Standardize where possible
- Visual controls
- Key participants
- Expected Outcomes
- Time keeper
- Scribe for live notes

UHS Temecula Medical Center - Big Room Agenda
Predict, Plan, Perform, Perfect *Intent, Capability, Results, Integrity*

Date: Tuesday, July 12 Facilitator: Jeff H. UHS Onsite: Tara Visitors:

Stay on Track

ENOUGH
LET'S
MOVE
ON

3. What could go wrong?

Commonly Occurring Risks

- The team spirit diminishes and people gravitate to their silos and “us-them” thinking.
- Death by meetings – we don’t have time to do our work because we’re always in meetings.
- Enthusiasm wanes, this becomes just another day.
- Meetings start late because of late arrivals.
- Leadership quits listening and becomes directive.
- Planners don’t follow the plan, go rogue.

Drift to Traditional....

Lean Construction Institute
Immersive Education Program

4. Learning

Learning Opportunities

Simulations

Photo Credits: InsideOut Consulting, Inc.

Reading/Discussion Groups

Learning

Team Health & Assessments

- Teams need to assess how they are doing as they progress through a project.
 - Chemistry
 - Collaboration
 - Teamwork
 - Meeting Commitments
 - Innovation/Creativity
 - Target Value Delivery
 - Learning & Coaching
 - Excitement
 - Attitude/Fun
 - Building relationships
 - Transparency

Team Monthly Average Scores

Photo Credit: UHS

Retrospectives/Continuous Improvement

- Quick retrospective – conducted at the end of every meeting.
- Regular occurring retrospective – conducted at the completion of work cycles.
- Event-based retrospective – conducted at the completion of major milestones.
- Impromptu - when a breakdown is declared or other reason arises.

Retrospective

Lean Construction Institute
Immersive Education Program

5. Onboarding

Onboarding Considerations

- Who
- When
- How can you get them “up to speed” on:
 - Project status and milestones
 - Team culture
 - Expected/desired behaviors
 - Safety
 - How we plan and execute
 - What we expect when problems occur

Onboarding is not a one-time event; it is a continuous process where concepts and culture are always reinforced.

Onboarding

Lean Construction Institute
Immersive Education Program

6. Technology

What technology support is needed?

- SMART type boards
- Video conferencing
 - Large group
 - Individual with remote team members
- White boards
- Internet / companies' connectivity limitations
- PM/Documentation Software
- Shared files vs. separate networks
- Printing & Plotting
- Projection

Lean Construction Institute
Immersive Education Program

7. Meetings That Matter

Effective Facilitation Practices

- Collaboratively developed
- Clear
- Standardize where possible
- Visual controls
- Key participants
- Expected Outcomes
- Time keeper
- Scribe for live notes

Decision Making

- A3 thinking
 - collaborative document managed by a single champion.
- Choosing by Advantages (CBA)
 - a collaborative decision making system to help simplify, clarify and unify the decision making process.

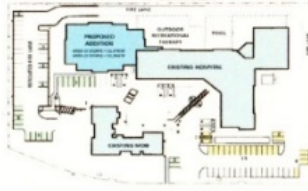

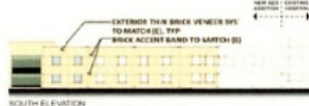

A3 #	Title	Revision	Champion	Date Started	Collaborators	Approved By	Date Approved	Status	
04	Option to build structural infrastructure for a future third floor or build a third floor shell.	1	N. Pera	3/27/2012	J. Gore, S. Stack, R. Migliori, S. Truesdale, N. Pera, J. Allen, K. Cook, S. Rasmussen	-	-	<input type="checkbox"/> Development <input type="checkbox"/> Collaborative Review <input type="checkbox"/> Implementation	FREMONT HOSPITAL
<div> <div> Section 1 - Define / Background Information <p>Project design services are approved for a 52 Bed, two story, 22,000sf bed wing. Project will be designed as an I Occupancy OSHPD Category 3. UHS Fremont could use space immediately. The project models are currently figured as shallow foundations with a strl steel frame. Initial budget targets where explored at \$235K/bed, however UHS has expressed an interest to reduce the targets 20-25% to align them closer with other US built facilities.</p> <p>March 27, 2012</p> </div> <div> Section 2 - Problem Statement / Current Condition <p>Fremont Hospital has observed a need for additional beds and has been turning potential patients/revenue away due to lack of onsite beds. This bed addition may be the last potential development on this site for the foreseeable future. If provisions are not made to maximize the size of this addition, the site may never be able to add additional beds without incurring significant costs. With current setbacks this is the last buildable site area and future construction would be limited to demolition of existing structures.</p>  <p>Proposed Addition Leaves No Future Buildable</p> <p>March 27, 2012</p> </div> <div> Section 3 - Future Goal / Target Condition <p>Provide options which allow for future expansion of beds or general office space.</p> <p>Target Condition 1 Build a new two story bed wing addition with no accommodation for a future floor.</p> <p>Target Condition 2 Increase foundations and structural frame to accommodate future added third floor.</p> <p>Target Condition 3 Build third floor in shelled out condition.</p> <p>Target Condition 4 Build third floor with 26 new beds including all interior improvements.</p> <div>   </div> <p>2 Story Rendering 3 Story Rendering March 27, 2012</p> </div> </div>									
<div> <div> Section 4 - Analysis / Think <p>We worked with the onsite facilities team to track down the existing structurals drawings. Currently a soils report is not available, however the existing structural drawings clearly indicate that a deep foundation option was not used with in the original design. Until the geotech report is completed we can not confirm whether or not deep foundations will be required due to specific findings or new structural codes.</p>  <p>Existing Foundation Plan</p> <p>Target Condition 1 - No Third Floor Cost Variance To TVD \$ - Schedule Variance (Weeks) +0 Weeks This allows for no future site growth given the projects site geography and setbacks.</p> <p>Target Condition 2 - Structural Infrastructure For Third Floor Increase the structural columns and braces to accommodate a future third floor + 1.25-1.75lb/sf for gravity columns and increased brace sizes. Foundation concrete would increase by approximately 40-50 cuysd. Low Cost Variance To TVD \$ 70,000 Schedule Variance (Weeks) +0 Weeks High Cost Variance To TVD \$ 445,000 *** Potential cost if unfavorable soils. +4-5 Weeks Lowest initial cost premium to accommodate a future 3rd floor. Codes change on a periodic basis and this does not guarantee that this design will meet future codes. Future construction would also be burdened with removal and reinstallation of roof top MEP equipment. The 3rd floor could not be added without significant disruption incl temporary 1st and 2nd floor vacancy.</p> <p>Target Condition 3 - Shelled Third Floor Adds complete structure, exterior skin, conveyance, and MEP infrastructure for future bed wing. Low Cost Variance To TVD \$ 1,800,000 Schedule Variance (Weeks) +4-5 Weeks High Cost Variance To TVD \$ 2,175,000 *** Potential cost if unfavorable soils. +8-10 Weeks The 3rd floor could be added with minimal disruption, wont not require 1st and 2nd floor vacancy. The 3rd floor TI construction would be significantly more expensive due 1st and 2nd floors occupancy.</p> <p>Target Condition 4 - Third Floor Built Out With 26 Beds Complete finished/built out 26 bed unit. Low Cost Variance To TVD \$ 5,350,000 Schedule Variance (Weeks) +6-8 Weeks High Cost Variance To TVD \$ 5,725,000 *** Potential cost if unfavorable soils. +10-12 Weeks Maximizes the site bed count.</p> <p>April 9, 2012</p> </div> <div> Section 5 - Proposed Counter Measures /Plan <p>Revised this A3 to include potential high end costs if soils report does not come back favorable.</p> <p>April 9, 2012</p> </div> <div> Section 6 - Follow Up <p>TBD for outcome of UHS internal meetings.</p> <p>-</p> </div> </div>

Kickoff Meeting Framework

- Design Vision
- Team Structure
- Team Culture

When is the right time to implement the Big Room?
When is **too soon**? When is **too late**?

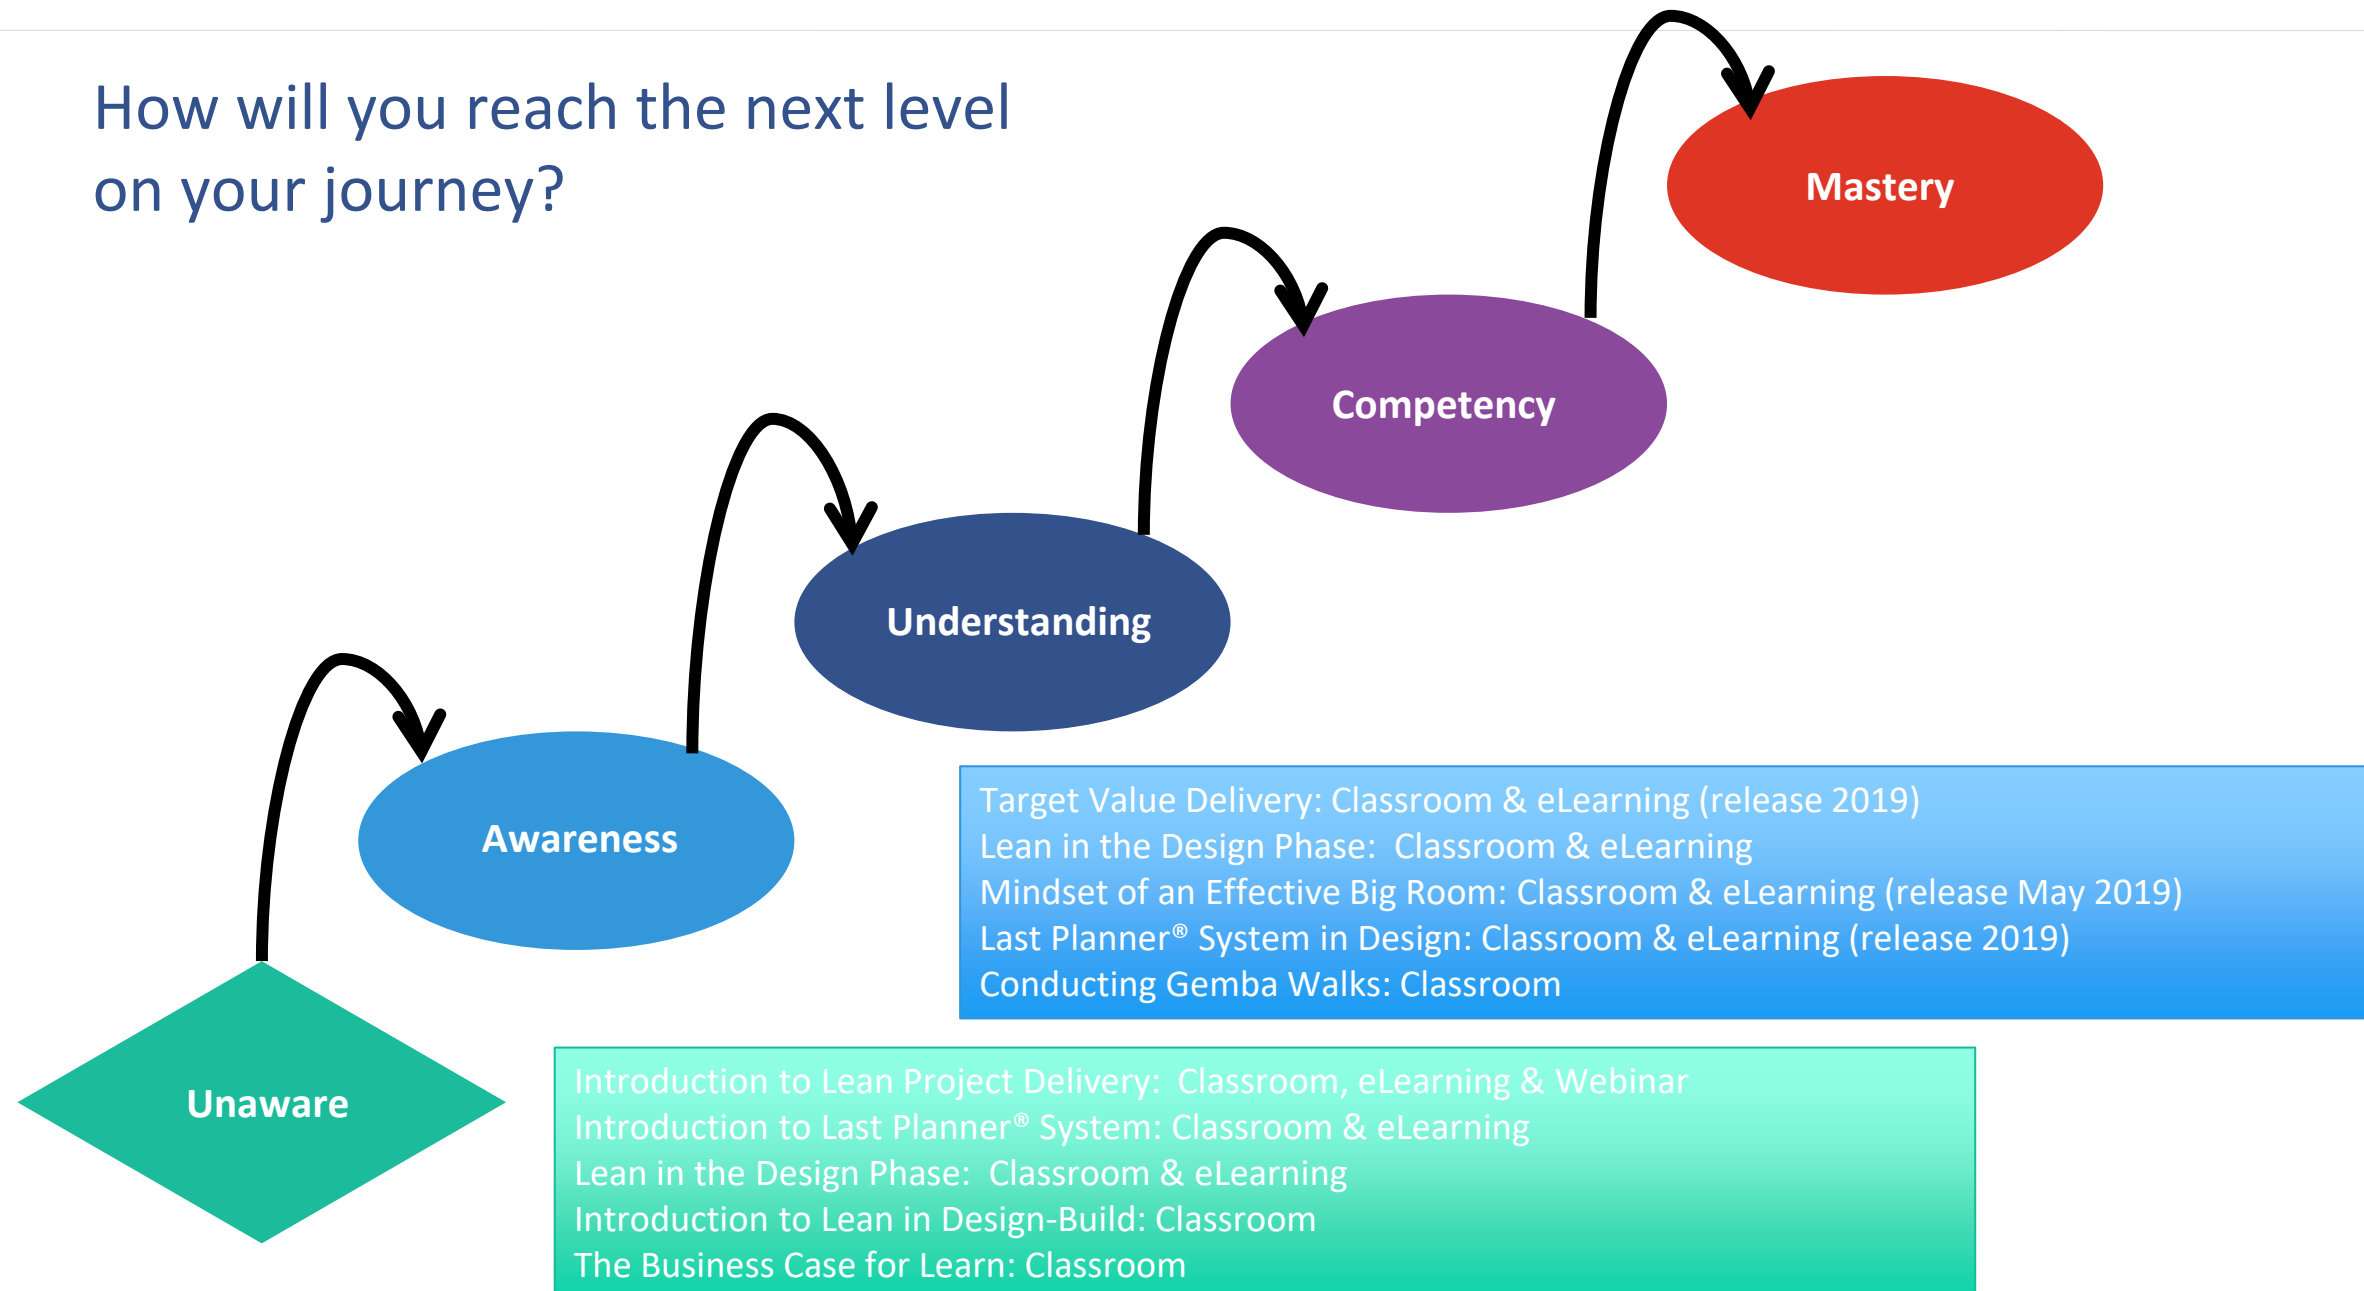

Discuss as a whole group.
(10 minutes)

Take Live Notes.

Lean Journey to Mastery

How will you reach the next level on your journey?

Introduction to the Last Planner® System

Please enter your first name below then click the button to begin.

BEGIN

WELCOME

This course will allow you to gain in-depth insight to the practical application of the Last Planner® System (LPS) through multimedia, hands-on interactions, diagrams, worksheets, and more. The key achievable goal of this course is to learn how to engage at all five levels of LPS effectively on a day-to-day basis with a team implementing the system.

Questions?

Learning Objectives Review

Define the meaning of a Big Room, and understand the purpose and benefits of implementing the approach to improving project outcomes.

Understand the characteristics and behaviours of a Big Room Team including aspects of effective facilitation.

Identify the venue types for hosting a Big Room, and discover the key elements for tailoring the space to support collaborative activities.

Gain insights into how the Big Room approach supports knowledge sharing and enhanced collaboration.

23RD LCI CONGRESS
OCTOBER 19-22

In the spirit of continuous improvement, we would like to remind you to complete this session's survey! We look forward to receiving your feedback.

Conduct Plus/Delta

 Plus: What produced *value* during the session?

 Delta: What could we *change to improve* the process or outcome?
